DETAILED ACTION

1. This action is in response to application (after final claim amendment (07/31/2007) has been entered and the petition has granted (07/31/2007), the final mailed on 05/31/2007 has been withdrawn), filed on July 31, 2007 has been considered but are deemed moot because of Restrictions Request below.
2. Claims 1-5, 7-14, 16 19-43 and 54 are pending.

Election/Restrictions

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 7-14, 16 and 19, drawn to method and system for searching data with searching query and providing the results of searching with multi-dimensional graph, which is query processing or searching, classified in class 707, subclass 3.
 - II. Claim 20-43, drawn to, for designing visual representation for each of the search results and plotting each of the visual representation on a multi-

dimensional graph display, which is displaying processing, classified in class 715, subclass 526.

4. The inventions are distinct, each from the other because of the following reasons.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for searching data with searching query and providing the results of searching with multi-dimensional graph, which is query processing or searching. Invention II can be used for designing visual representation each of the search results and plotting each of the visual representation on a multi-dimensional graph display, which is document presentation or document displaying processing. See MPEP 806.05(d).

5. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I, is not required for Group II each other, restriction for examination purposes as indicated is proper.

Art Unit: 2166

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

9. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
